NURSERY VALUES

THE LOGICAL PLACE TO BUY trees, shrubs, evergreens and flowers is direct from the nursery where they are grown.

The nursery trade grows plants, living things, and then sells them to those who will buy. These living things are valueless to the purchaser unless they continue to live after he has bought them. There are certain definite conditions required while these plants are being transferred from the nurseryman until they are properly planted on the purchaser’s grounds.

For this reason, nursery stock does not lend itself to merchandising by a middle¬man, to be piled on store counters and sold as cheap, shoddy merchandise.

Anyone with plant sense knows that every hour a plant is separated from mother earth, it constantly loses vitality unless precautions are taken to prevent it.

ROSE HILL NURSERY plants reach your home as fresh as the moment they were dug from the earth in which they grew. Dealing with the Rose Hill Nursery you are assured of dependable quality and efficient service backed by sixty years of honest business practice.

It takes several years to grow salable nursery stock. The prices in this catalog are based on the low cost of production the past few years. With the present higher costs of production, higher selling prices must necessarily follow in the near future.

A CORDIAL INVITATION

VISIT OUR NURSERY. One hundred acres of fine trees, evergreens, shrubs
and perennials.

In the show garden bordering the entering road you will find hundreds of shrubs, perennials and evergreens all plainly marked with their correct names. Walking upon a grass path you can study at your leisure the plants most worth while for use in this section.

The rock garden, waterfall and pool are here, too, and you will find these of interest.

Then if you desire to walk further there are acres and acres of sturdy growing plants to browse among. You are cordially invited to come and study the plants as often as you like.

HOW TO REACH THE ROSE HILL NURSERY

From Minneapolis drive out East Hennepin Ave. directly to the Nursery, which is located two blocks east of the city limits. Take Como-Harriet street car going towards St. Paul, get off at Eustis Street, walk three blocks north.

From St. Paul drive north on Snelling Ave. past Fair Grounds one-quarter mile, turn west on Larpenteur Ave. (also known as County Road A) one and one-half miles to our office. Take Como-Harriet street car going west, get off at Eustis Street and walk three blocks north.
Planning is the First Step in Achieving Beautiful Home Grounds

A well designed plan not only assures beautiful grounds but secures a maximum in beauty at minimum cost.

To plan well requires knowledge in the art of landscape design and familiarity with plant materials.

Rose Hill plans and Rose Hill plants are your guarantee of satisfaction.

Our landscape service to residents of the Twin Cities and their environs

To local residents—where personal consultation is possible, plans and estimates are furnished free of cost. Simply call at the office with a few pictures or measurements of that portion of your grounds you desire planted, or ’phone us and one of our landscape architects will call and consult with you. This incurs no obligation.

Our experienced gardeners are available for any gardening service you may desire. Ask for any information you may wish regarding this service.

Phone Nestor 7541 from either Minneapolis or St. Paul.

It Costs Less

by the Rose Hill method to install a correctly designed planting, because every tree or shrub planted has a definite part in the design and haphazard planting is done away with.

Beautiful grounds express refinement and good taste.

What delightful memories children will have of a yard like this.
LANDSCAPE SERVICE
WHETHER YOUR GROUNDS ARE LARGE OR SMALL
WILL BE VERY GLAD TO HELP

Your Last Opportunity to Plant While Prices Are Low
Nursery stock is sure to advance in price, for production costs have already advanced materially.

OUR LANDSCAPE SERVICE TO OUT OF TOWN CUSTOMERS
An easy way of obtaining planning help is provided for those residing away from the Twin Cities.
Upon request we will mail a chart showing what measurements are required and how to show these measurements on paper. When we receive the measurements a planting plan will be prepared and mailed.
In order to prevent merely curious persons from obstructing this service a deposit of $5.00 is requested, as an expression of sincere interest, and should be enclosed when the chart is sent for. This deposit will be credited toward the purchase of nursery stock needed to carry out the plan, so the plan really costs nothing.
If you contemplate planting take advantage of this free plan offer.
A large residence property, a park or cemetery development would quite likely require that one of our architects make a personal call, for which a time and expense charge would be made. We invite correspondence regarding any such project.
Our expert gardeners are available to supervise planting and any gardening construction work.

A List of Those We Have Helped
during our sixty years of service would constitute a veritable blue book of this section.
Thousands of beautiful homes have been created.

For a house with steps on the opposite side simply reverse this plan.

Phone Nestor 7541 from either city.
The plan shown here will transform a typical back yard into an Outdoor Living Room. If your grounds are somewhat near this size the plan can be made to fit very easily. If your garage and walk are on the other side simply reverse the plan.

No need to do the planting all at one time. Notice how the groups are divided so that the planting may be done easily step by step.

HEDGES—BEAUTIFUL BORDERS OF LIVING GREEN

THE cheapest wall or fence and the best is the living hedge. It does not need to be painted as it gives itself a new coat every year. A hedge will effectively screen out undesirable views or shut out trespassers. Planting a hedge where you need a fence. Listed below will find hedge plants suited for all purposes and locations. Our plants are grown in the open nursery rows where they have been given ample room for both root and top development.

PLANTING THE HEDGE

When Buckthorn, Cotoneaster and Caragana are used, plant 8 to 10 inches apart in single row, or if a very heavy hedge is wanted plant 12 inches apart in a double row, planting rows 6 to 8 inches apart, plants staggered.

The remainder of the plants listed on this page should be planted one foot apart in a single row.

Do not fail to trim every plant immediately after planting to at least one-half its original size. Leaving only the lower one-fourth would be still better. The secret of securing a dense hedge is to cause the plants to branch out near the ground by trimming as advised above.

BARBERRY, JAPANESE or THUNBERG’S. (Berberis Thunbergii). Of low spreading growth, forming a dense hedge. The twiggy branches are set with small, sharp thorns and bright, clean foliage which in the fall turns to gold and scarlet. The brilliant red berries are attractive in the fall and winter. A fine plant for a low hedge whether trimmed or allowed to grow naturally.

12 to 18 in...$15.00 per 100 18 to 24 in...$17.50 per 100

HUCKTHORN. (Rhamnus Catharticus). A very satisfactory plant to use when a medium high to tall hedge is wanted. It stands trimming so well that it can be kept to any height desired. The foliage is of a rich, healthy green and remains clean looking throughout the summer. It is hardy and one of our most satisfactory hedge plants.

12 to 18 in...$16.00 per 100 2 to 3 ft...$14.00 per 100

CARAGANA or SIBERIAN PEA TREE. (Caragana Arboreus). Thrives in all well-drained soil and is hardy in the most exposed locations. Is suitable for use as a high or tall-growing hedge. The twiggy branches are set with small, sharp thorns and bright, clean foliage. Sometimes the foliage does not remain in good condition during the latter part of the summer.

COTONEASTER or QUINK BERRY. (Cotoneaster Acutifoliat). The fresh looking, glossy green foliage of this plant and its thorny, dense growth, combined with its hardiness, makes it ideal as a hedge plant for use in Minnesota. Even during periods of extremely dry hot weather the foliage retains its healthy glossy green color, having the appearance of being varnished. It stands trimming well. The foliage is usually through November. Average height eighteen to twenty-four inches.

12 to 18 in...$15.00 per 100 2 to 3 ft...$15.00 per 100

CURRENT, Alpine. (Ribes Alpinum). Choice plant for use where a hedge of rather low growth is wanted. It is white flowering early and has dense foliage of a pleasing green. Will stand partial shade. We recommend this plant where a low hedge is desired.

10 to 12 in...$12.00 per 100 18 to 24 in...$25.00 per 100

DOUGWOOD, SIBERIAN. (Cornus Siberica). There is some demand for this plant for hedge use on account of its attractive red bark. As the plant grows older, however, it becomes thin at the bottom and is not perfectly satisfactory.

18 to 24 in...$20.00 per 100 2 to 3 ft...$35.00 per 100 2 to 3 ft...$35.00 per 100

HONEY SUCKLE, Tatarian. (Lonicera Tatarica). For use as a large hedge this plant is very satisfactory.
At small expense you can plant a tree that will grow into priceless value.

ASH, White. (Fraxinus Americana). A tall growing native tree. Comparatively free from insect pests and a clean tree. It is very desirable for use as a lawn specimen or for the boulevard. See cut.

CRAB, Dolgo. A highly ornamental tree. The tree not only serves as a handsome lawn specimen but produces beautiful bright red fruit of fine quality which makes a red colored jelly of excellent flavor.

4 to 5 ft. high...$0.75 5 to 6 ft. high...$1.50
6 to 7 ft. high...$2.00

CRAB, Flame. (Minnesota No. 625). This is primarily an ornamental crab but the fruits, though small, make an excellent red jelly. The flowers are similar to other crabs but are borne in great profusion. The tree is compact in growth and of medium size, suitable for lawn planting. The fruits are a brilliant red and hang tenaciously to the trees until mid-winter months after the leaves have fallen. The effect is a mass of flaming red color from August until November. Trees 5 to 6 feet high often have 250 or more brilliant red colored crabs. The fruit during December and January is attractive to winter birds. As an ornamental tree in the fall it rivals all other trees with its attractive bright red fruit. Among the ornamental trees in our nursery last fall this ornamental crab attracted by far the most attention.

3 to 4 ft. high...$0.75 5 to 6 ft. high...$1.50
6 to 7 ft. high...$2.00

CRAB, Hops. The red new foliage and the beautiful single red blossoms which completely cover the tree in the early spring make this tree the most attractive of spring flowering ornamental trees. The fruit is small, red inside and out, remaining on the tree until autumn. The tree is hardy and blooms while very young.

Rose Hill Evergreens are Famous for Their Beauty

PRICES INCLUDE BALLING AND BURLAPPING OF ALL EVERGREENS

This means that the tree is dug from the soil with the earth remaining undisturbed about the roots of the tree. The ball of earth is securely fastened with burlap. This method practically insures safe transplanting.

In some varieties we have larger sizes than listed, upon which we will be glad to quote prices.

ARBOVITAE, American. (Thuya Occidentalis). A native evergreen. Usually grows bushy at the bottom tapering toward the top. Color a rich dark green. Stands trimming well and is therefore suitable for hedges. Also very decorative singly or in groups. Will grow in partial shade.

GLADIOLUS

For beautiful flowers available from July until late fall, there are none more dependable or magnificent than the Gladioli. Planted in clumps they are attractive in the garden and as a cut flower they have no peer. By planting at intervals, about one week apart, starting the first part of May and continuing to the middle of June, a succession of bloom may be had from July until late fall. Plant the bulbs in cultivated, well drained soil about 6 inches deep.

Expect fine plants, you will not be disappointed.
They do best in full sun. When cutting 3 or 4 leaves should be left to the plant which will allow the bulb to properly mature. After the first killing frost, take the bulbs up carefully and cut off the stalk about 1-inch from the bulb and allow it to dry about one week. Then pack in shallow boxes and place for the winter in a cool dry cellar where the temperature will not go below freezing. The following varieties are among the most lovely and dependable:

PEONIES

Care should be taken in planting the Peony, to set the roots with the eyes about 2 inches below the surface of the soil. Planting too deep will prevent blooming though the plant may otherwise seem healthy. Peonies do best in fairly heavy soil. If therefore, your ground be very light and sandy it is advisable to incorporate considerable clay with it. Peony roots resent coming into direct contact with most manures but a little bone meal and hardwood ashes worked into the soil will aid materially. Peony plants we offer are strong 3 to 5 eye roots.

TULIPA CULTIVAR.* A dwarf growing creeping plant with fragrant foliage. Covered with brilliant scarlet colored flowers during June and July. 4 to 6 inches. 25c each. Dozen $2.50.

TROLLUS, Globe Flower. A free flowering plant of the buttercup order. Large, orange-yellow blossoms. 18 to 24 inches. May to August. Grows well in a moist semi-shaded position. 25c each. Dozen $2.50.

VIOLA CORNUTA-TUFTED PANSIES. The flowers resemble the common Pansy in form, though not quite so large. Of very free flowering habit, they bloom from April until October and constitute a most colorful addition to the garden. The following varieties are among the very best:

JERSEY GEM. Pure, rich bluish-purple slightly perfumed flowers. A most attractive variety. 25c each. Dozen $2.50.

LUTEA. The flowers are a bright golden yellow, contrasting beautifully with the darker shades of other varieties. 25c each. Dozen $2.50.

VIOLA CORNUTA-CONT. PERFECTION. Light blue flowers in profusion. Very lovely with the yellow sort. 25c each. Dozen $2.50.

SCOTCH BORDER. The flowers are a perfect riot of color, combining practically every shade. 25c each. Dozen $2.50.

RTACA FILAMENTOSA. Adams Needle. The creamy white flowers are carried on tall drooping stems. Produced on tall stems up to 4 or 5 feet. The foliage is sword-like and woody. July. 25c each. Dozen $2.50.

VIOLA GLAVA. The leaves are sword-like, rather narrow; grayish-green in color. Flowers are bell-like, drooping white, borne on stems about 3 feet tall. An exceedingly hardy drought resistant variety. 25c each. Dozen $2.50.
CLIMBING VINES

VINES create a graceful softening effect. The flowering beauty of many varieties has splendid merit and as shade givers they are very fine. Used to embellish an otherwise drab wall or ugly bank, they are indispensable.

BITTERSWEET. (Celastrus scandens). A hardy, strong growing vine with glossy leaves. The yellow flowers are followed by conspicuous reddish-orange fruits.
2 yr..............$0.50 3 yr..............$0.75

Clematis, Duchess of Edinburg. The lovely, large, double white variety blooming over a long period.
2 yr..............$1.00 3 yr..............$1.25

Clematis, Gypsy Queen. A fine, new introduction. Flowers size of Jackmani with rich, velvety purple color.
2 yr. .............$1.10 3 yr. .............$1.25

Clematis Jackmani. The gorgeous display of bloom presented by this plant is unequalled among climbing vines. The striking purple flowers often measure six inches across. Being of refined habit it may be grown against the house and in other situations where a coarse growing vine is not wanted. This Clematis is the most popular vine of all. See cut.
2 yr. .............$1.00 3 yr. .............$1.25

Clematis, Madame Edward Andre. Flowers are about the same size as the Jackmani, crimson red in color. Has a long season of bloom.
2 yr. .............$1.00 3 yr. .............$1.25

Clematis paniculata. The flowers are white, small and star-shaped, very fragrant and so abundant as to almost hide the foliage. It blooms late in the summer when most other vines are through blooming.
2 yr. .............$0.50 3 yr. .............$0.75

Clematis Ramona. Flowers are large, light blue. A very free bloomer.
2 yr. .............$1.00 3 yr. .............$1.25

Dutchman's Pipe. (Aristolochia Siphon). A vigorous rapidly-growing climber with pipe shaped flowers. The light green leaves are of very large size, and overlapping they cast a dense shade.
2 yr. .............$0.75 3 yr. .............$1.00

Grape, Beta. This grape makes one of the best vines for covering porches and arbors. It is perfectly hardy without winter protection and produces an abundance of fruit of medium size.
2 yr. .............$0.40 3 yr. .............$0.60

Honeysuckle, Scarlet Trumpet. (Lonicera sempervirens). An old favorite; bearing scarlet, trumpet-shaped blossoms over a long period.
2 yr. .............$0.50 3 yr. .............$0.75

Ivy, Boston. (Ampelopsis veitchii). A very lovely vine refined in habit. Clings firmly to such surfaces as presented by brick, coarse plaster, etc. The foliage is fresh deep green in summer, changing to the brightest shades of crimson and yellow in the fall. Vines will often winter kill somewhat during the winter, but the plant comes on very nicely with new growth each spring.
2 yr. .............$0.50 3 yr. .............$0.75

Ivy, Engelmann's. (Ampelopsis Engelmannii). The hardiest climbing Ivy for this climate. Splendid to cover brick or stone walls or any other rough surface, as it requires no trellis to grow on. It is a rapid grower. The young growth has a purplish tinge, maturing dull green and turning a bright crimson color in the fall. See cut.
2 yr. .............$0.50 3 yr. .............$0.75

Ivy, American or Virginia Creeper. (Ampelopsis Quinquefolia). A popular native vine with deeply cut leaves which turn to a beautiful crimson in the fall. Fine for covering rocky slopes, arbors, fences, etc.
2 yr. .............$0.35 3 yr. .............$0.50

Matrimony Vine. (Lycium Chinense). Planted at the top of walls or embankments, this vine hangs gracefully down covering beautifully the unsightliness of the ugly surface. The small, star shaped, purple flowers are succeeded by bright, scarlet, coral-like berries nearly an inch long.
2 yr. .............$0.35 3 yr. .............$0.50

Clematis Jackmani

CLEMATIS CULTURE

Plant in well drained rich soil. The hole should be deep enough to accommodate the roots without spreading too much. If the roots are very long and numerous they may be cut back to 6 or 8 inches and some of the weaker roots thinned out. The roots should be separated enough so that soil comes firmly into contact with all the roots. Water thoroughly once a week only, if rain has not already done the watering.

ROSES

ROSE HILL ROSES are FAMOUS for QUALITY

OUR roses are extra fine large plants that bloomed freely last summer, most varieties being 2 to 3 feet high and with ordinary care will produce an abundance of flowers this coming summer. No better roses can be purchased. Our plants have not been packed in boxes and exposed on bargain counters for days, but are fresh from our nursery.

These fresh roses at 50c each are fully as good quality and size as roses sold in packs at stores for $1.00 each.

EVERBLOOMING HYBRID TEA ROSES

THESE are the so-called everblooming roses. If the bushes are kept healthy and in good growing condition, though they do not bloom all the time, one crop of flowers follows another at short intervals from June to late October. Winter protection is necessary. The flowers are very beautiful in color, form and fragrance.

Strong 2 yr. plants 50c each, extra heavy 75c each except as noted.

COLUMBIA. Bright pink sweetly scented flowers of fine form, stiff petals deepening in color as they expand. See cut.

ETOILE DE HOLLANDE. The half-opened flower is perfect in form and develops into a large, artistically loose bloom of brilliant crimson. It has wonderful fragrance. The plant is strong, with large, healthy foliage, and will thrive in almost all soils and situations.

Strong 2 yr. plants 75c each, extra heavy $1.00 each.

GRUSS AN TEPLITZ. The double blooms of medium size are brilliant crimson with darker shadings. Splendid fragrance. Blooms most freely in open clusters through the whole season. A universal favorite. See cut.

HADLEY. A rich crimson-red flower with velvety texture, good form and lovely perfume. See cut.

KAISERIN AUGUSTE VICTORIA. Well formed, creamy buds develop into flowers of perfect form, snow white with slight tint of yellow at the center. Fragrant. Extremely lovely.

KILLARNEY. Has long pointed buds opening to a flat flower with enormous petals. Bright pink in color. A very free flowering, vigorous grower. See cut.

PINK RADIANCE. The most reliable pink Hybrid Tea Rose. Brilliant rose pink buds, opening to well shaped very fragrant flowers, which have splendid keeping quality when cut. See cut.

RED RADIANCE. The flowers are large, deep red; produced freely until frost. Foliage excellent. A very popular rose.

ROSE MARIE. Fragrant, clear, rose-pink flowers of large size, borne freely on plants of notable vigor and health.

SUNBURST. Beautiful yellow flowers strongly suffused with orange at the center. Flowers are well shaped and fragrant. See cut.

HYBRID PERPETUAL ROSES

THESE roses produce a splendid display of bloom. The flowers are large, full and very fragrant. Hybrid Perpetual Roses are more hardy than the Hybrid Tea class. They are not, however, as profuse bloomers. With the proper covering they can be generally depended upon to live through the winter in our severe climate.

Strong 2 yr. plants...$0.50 ea. Extra strong plants...$0.75 ea.
HYBRID PERPETUAL ROSES—Continued

CAPTAIN HAYWARD. The scarlet crimson flowers are of splendid form. Very large and fragrant. Blooms over quite a long period on a big strong plant.

FRAU KARL DRUSCHKI. Considered the best white rose of any class. The splendid snow-white flowers have beautiful form but are without fragrance. Blooms are borne freely on a very strong growing plant. See cut.

J. R. CLARK. The color is unique among roses, a deep scarlet shaded to blackish crimson. The flowers are very double, slightly fragrant. Requires severe pruning.

MAGNA CHARTA. The very double flowers are large, bright pink in color and strongly perfumed. Blooms profusely in season on strong erect growth.

MARTY H. WILDER. Flowers are large, a bright carmine, very fragrant. A strong grower with handsome foliage.

MRS. JOHN LAING. Soft pink, of beautiful form; exceedingly fragrant and remarkably free-flowering. A vigorous grower with handsome foliage. See cut.

PAUL NEYRON. Blooms are lilac-rose of very large size. Fragrant and double. The plant is a strong grower and a very profuse bloomer.

CLIMBING ROSES

These require training to a trellis or upright support of some sort. Anyone willing to give them the required attention will be more than repaid by the graceful beauty of these plants. Require winter covering.

Strong 2 yr. plants...$0.50 ea. 3 yr. ....................$0.75 ea.

CRIMSON RAMBLER. The flowers are produced in great trusses, often thirty or forty in a cluster, appearing like large bouquets. The roses are small, semi-double, and of a bright crimson color.

DOROTHY PERKINS. The rather large, double, clear shell-pink flowers are borne in pendulous sprays. The fragrant flowers do not fade in color.

DR. W. VAN FLEET. The perfectly formed buds are borne on long stout stems, in color they are flesh pink, deeper at the center. Splendid for cutting, very fragrant. Dark glossy foliage.

EXCELSA. The deep scarlet crimson blooms are produced in profusion in large clusters. A vigorous grower. Has largely replaced the Crimson Rambler.

PAUL'S SCARLET CLIMBER. The well shaped scarlet flowers are of moderate size and borne in small trusses. They are borne early and last a long time. The plant is of moderate size with good foliage. See cut.

TAUSENSCHÖN or THOUSAND BEAUTY. Prettily ruffled large flowers of shades of creamy white and changing to bright rose-pink. A healthy grower.

WHITE DOROTHY PERKINS. The flowers are rather small and very double of pure creamy white. Blooms in profusion on strong healthy plants.

BABY RAMBLER OR POLYANTHA ROSES

These rather small, bushy plants are the most truly everblooming of all roses. The bloom is borne in heavy clusters throughout the summer until frost. The size of the bush makes it especially adaptable to home yard plantings. Require careful covering for winter.

2 yr. old plants .......................$0.50 ea.

CATHERINE ZIEMET. Double, pure white flowers in abundance, borne in large fragrant clusters.

ELLEN POULSEN. Bright rose-pink, almost single flowers of good size. Fragrant and thrifty growing.

MISS EDITH CAVELL. The semi-double flowers are a brilliant scarlet red, rather small in size, produced in large clusters.

RUGOSA ROSES AND HARDY BUSH ROSES

HOW TO PLANT ROSES

1st. Dig a hole so large the roots won’t be cramped.

2nd. Place plant depth shown. Fill hole nearly to top with rich soil. Water thoroughly to firmly settle soil.

3rd. Trim plant to about 7 or 8 inches in height as picture shows.

4th. Cover entire top of the plant with a mound of loose soil about 9 inches high.

5th. In about two weeks pull a little of the loose soil away to observe if buds are bursting open. If buds are opening, carefully pull away the mound of loose soil. If buds are still dormant leave the mound of soil until buds are observed to burst open, then remove mound.

WINTER COVERING—Cover for winter this same way and over the mound place about a foot of marsh hay, then a layer of building paper.

Visit us during the summer when the perennials are in bloom.
THE thrifty housewife has long known the savings made when fruits are grown at home. There is something about home grown fruit that is different. It tastes better than any other. For their ornamental qualities alone, fruit trees are worth while. The next best thing to eating berries right off the vine is to have them served to you directly after picking.

FLAME. (Minnesota No. 625). This is primarily an ornamental crab but the fruits, though small, make an excellent red jelly. The flowers are similar to other crabs but are borne in great profusion. The tree is compact in growth and of medium size, suit¬able for lawn planting. The fruits are a brilliant red and hang tenaciously to the trees until midwinter months after the leaves have fallen. The effect is a mass of flaming red color from August until November. Trees 5 to 8 feet high often have 250 or more brilliant red colored crabs. The fruit during December and January is attractive to winter birds. As an ornamental tree in the fall it rivals all other trees with its attractive bright red fruit. Among the ornamental trees in our nursery last fall this ornamental crab attracted by far the most attention.

HUNGARIAN. Fruit is of fair size and quality good. Resembles Alpha.

MOORE'S EARLY. Black, earlier, larger and better quality than Concord, but not quite as productive.

POCKlington. White; bunch and berries large.

STRAWBERRIES

ALL varieties offered below have perfect flowers and will bear fruit if planted alone.

Everbearing

PROGRESSIVE. The best everbearing strawberry. The fruit is of good size and flavor, smooth, of good color and appearance.

MASON. The largest everbearing strawberry grown. The berries are uniform and large to the end of the season instead of running small.

Junebearing

BEAVER. A promising new variety considered by many fruit growers to be the best market and home variety grown. Produces a heavy crop of beautiful red fruit of good size and quality.

PREMIER. Early. It starts fruiting nearly a week earlier than Dunlap and maintains a heavy production for a long period. The berries are bright red, very firm, solid inside and maintain their size well throughout the season.

SENATOR DUNLAP. This is the leading strawberry throughout the United States. It does well everywhere and produces enormous crops of fruit regularly. A first class shipper and retains its brightness long after being picked. The best market berry.

CURRANTS

Price $0.20 each, $1.50 per dozen, $10.00 per 100, except where noted.

CHERRY. Large, deep red, rather acid, bunches short; plants erect, stout, vigorous and productive.

LONDON MARKET. Regarded as the best market variety. The fruit is of good size and flavor, with perfect foliage which it retains throughout the season; an enormous cropper.

PERFECTION. In color it is a beautiful bright red. Very large in size. The clusters themselves are large and the size of the berries is maintained to the end of the bunch.

RED LAKE. A new red currant originated at the Minnesota Plant Breeding Farm. It is exceptionally large and of fine flavor. This variety has been tested for several years and has proven to be the largest and finest currant for both home and market use. 2 year plants 50c each. $5.00 dozen.

STEWART'S SEEDLING. Beautiful, light red fruit of large size and good quality. Bush a strong and healthy grower. Produces large quantities of fruit; excellent flavor. A profitable variety for market purpose.

WHITE GRAPE. The best white. Large, mild flavored, good for table.

GOOSEBERRIES

CARRIE. The best commercial berry. The fruit is a transparent green, turning to a rich wine or deep maroon color when fully ripe. One of the heaviest producers.

PEARL. A robust grower, free from mildew and very productive. Fruit large and superior in size and quality.

RED JACKET or JOSELYN. Fruit of very large size, smooth, red and of the best quality.

RASPBERRIES

MARSH HAY
For Winter Protection
In the late fall perennials should be covered for winter protection with about 6 inches of Hay. We have found the wild Marsh Hay to be the most satisfactory for this purpose and offer it for sale at a price of $1.00 per bale.

Should you desire us to put on the hay we shall be glad to do so locally. A time charge would be made for this service.
